# Chapter 1

## Test

Does AutoDoc have a way to allow that header block not to appear in the documentation generated from a .autodoc file like this?

Example

```
gap> S5 := SymmetricGroup(5);  
Sym( [ 1 .. 5 ] )  
gap> Size(S5);  
120
```

Some text between two examples

Example

```
gap> A5 := AlternatingGroup(5);  
Alt( [ 1 .. 5 ] )  
gap> Size(A5);  
60
```

And we wrap up with some dummy text
